

# Documentation of itreatBook Laravel

## Script installations

1. First clone or download the repository from github.com
2. URL : <https://github.com/qaisarabbaswebdeveloper/itreatBook>
3. Extract it if you download in zip file
4. Open Database folder upload Database file in phpmyadmin or mysql by import function
5. Then connect your database credential in **.env** file updating.
6. Just run this command **php artisan serve** <http://localhost:8000>
7. If images not working please make sure update correct APP\_URL in **.env** file
8. Admin Panel Login URL: **http://localhost:8000/admin**
9. Credentials Email : [admin@admin.com](mailto:admin@admin.com) Password: **password**
10. If cannot access then register user go to database open USER table just change the role user to admin then accessing you get in admin panel otherwise cannot.

**Note :** This script in development mode not complete the main function and architecture perform like CRUD operations in back-end admin panel Books Product add and remove , and show product in front-end page.
